

Encryption Chart

Decryption Chart

Header Files Used

1. **iostream.h**

For basic Input/Output operations such as cin, cout, getline() etc

2. **cstring**

For string functions such as strncpy(), strcmp(), strcmpi() etc

3. **windows.h**

To define types used by MMSYSTEM.H

4. **fstream**

For file operations such as open(), write(), read(), getline() etc

5. **MMSYSTEM.H**

For audio operations such as PlaySound()

6. **stdlib.h**

For functions such as system("cls") to clear the screen, system("pause") to pause the screen, random() etc

7. **ctype.h**

For character functions such as isupper(), isalpha(), islower(), toupper(), tolower() etc

8. **stdio.h**

For string and character array functions such as gets() etc.

9. **time.h**

For functions such as Sleep()
